

About us

Melanko Ltd. is a Polish company operating since November 1991. The area in which we are active is the production of natural spice mixes, functional blends, and many other types of additives used in meat processing, delicatessen, gastronomy and fast foods. In the realm of spice mixes we are able to do almost anything!

The company was established mainly for the meat industry, which in the beginning of the 90s needed a line of products that would help sustaining traditional Polish flavours. The past 20 years of experience allowed us to expand and today we try to reach every area of the market where spices are used.

In order to maximise our Client's satisfaction, we realise individual orders, adjusting the flavour and aroma of our spices to the receiver's needs. We make sure to provide our Clients with best quality products; the spice mixes we offer are composed only of the carefully selected natural ingredients. Every product bears a "non GMO" label: we do not use any genetically modified plants or its derivatives. Cooperating with our company is a guarantee of the finest products and unique flavours.
