

MELANKO'S Top Sellers:

1. MEAT PIE **TM-050**
2. 'POMORSKI' BLACK PUDDING **TM-640**
3. 'MAZURSKI' BLACK PUDDING **TM-630**
4. 'ŚLĄSKA' SAUSAGE **TM-390**
5. CASUAL SAUSAGE **TM-150**
6. 'TORUŃSKA' SAUSAGE **TM-210**
7. 'PARÓWKOWA' HOMOGENISED SAUSAGE **TM-070**
8. 'PODWAWELSKA' SAUSAGE **TM-385**
9. HOMELY SAUSAGE **TM-265**
10. AMSTERDAM-TATAR SAUSAGE **TM-030**
11. LUXURY BAR MEAT PIE **TM-590**

Among products listed above some are worth special recommendation:

- MEAT PIE – used by numerous companies; sells very well
- 'PODWAWELSKA' – a one of its kind spice mix
- 'PARÓWKOWA' – like in the case of the 'MEAT PIE': once You've tried it, nothing else compares
- In case of the BLACK PUDDINGS, 'MAZURSKI' additionally contains dried onion flakes
- CASUAL – thanks to our spice a sausage is no longer 'casual'

Additionally in our offer there are a few more interesting products, other than spice mixes for luncheon meat. We would like to mention so-called 'MAGUS':

1. MAGUS 3H – a basic version of 'MAGUS', equivalent of the traditional 'Maggi'
2. MAGUS 2M – a mushroom variation of 'MAGUS'
3. MAGUS 3SH – a 'MAGUS' variation with the addition of the smoking aroma

We would also like to recommend our smoking salt 'WEDZONKA' used partly as a substitute for pickling salt (it contains pickling substance, sodium nitrite, in a proper proportion). 'WEDZONKA' allows for shortening of the production process, saving the money spent on the production; still, the product is of the best quality since the smoking aroma is a natural extract!

The last group of our products, that actually created the *Melanko* brand, contains a series of best-selling brine, type CenterMix (CM).

- CenterMix 30 ZF/05 – with no phosphates, for smoked, raw, and long ripening meat

- CenterMix 30 F/05 – phosphate brine mix, used for pickling and injecting (up to 30-35%); it is meant for the smoked and seared products (efficiency is about 112-116%)
- CenterMix 30 F/05 M 'Honey' – phosphate brine mix containing a natural honey that gives the products a delicate honey taste. It is quite similar to CM 30 F/05; a variation without phosphates is also available
